

EACH YEAR IN CANADA, MILLIONS OF BIRDS ARE INJURED OR DIE DUE TO COLLISIONS WITH OFFICE AND RESIDENTIAL BUILDINGS.

# HOW TO HELP MAKE BUILDINGS FLIGHT SAFE FOR BIRDS

When working late and when localized light controls are available, use task lighting (table or desk lamps) instead of overhead lights.

Close window curtains and blinds at night.

Turn off non-critical exterior lighting during spring and fall bird migration seasons.

If surrounding greenery is reflected in your windows, consider a bird-deterrent window solution or move greenery away from windows.

Report a fallen bird at your home or workplace by calling Flap Canada at: 416.366.3527 or [flap@flap.org](mailto:flap@flap.org)
